What is a DOCTYPE in HTML? 

The HTML document type declaration, also known as DOCTYPE , is **the first line of code required in every HTML or XHTML document**. The DOCTYPE declaration is an instruction to the web browser about what version of HTML the page is written in. ... A DTD defines the structure and the legal elements of an XML document. Introduction

Get started with Bootstrap, the world's most popular framework for building responsive, mobile-first sites, with jsDelivr and a template starter page.

BOOTSTRAP, STYLE. CSS AND JS SCRIPT

```
<!DOCTYPE html>
<html lang="en">
  <head>
    <link href="https://stackpath.bootstrapcdn.com/bootstrap/4.5.0/css/bootstrap.min.css" rel="stylesheet">
    <link href="styles.css" rel="stylesheet">
    <title>CS 106 </title>
  </head>
  <body>
```

CSS

Copy-paste the stylesheet `<link>` into your `<head>` before all other stylesheets to load our CSS.

```
<link rel="stylesheet" href="https://cdn.jsdelivr.net/npm/bootstrap@4.5.3/dist/css/bootstrap.min.css" integrity="sha384-TX8t27EcRE3e/ihU7zmQxVncDAy5uIKz4rEkgIXeMed4M0jlfIDPvg6uqKI2xXr2" crossorigin="anonymous">
```

Copy

JS

Many of our components require the use of JavaScript to function. Specifically, they require [jQuery](#), [Popper.js](#), and our own JavaScript plugins. We use [jQuery's slim build](#), but the full version is also supported.

Place **one of the following `<script>`s** near the end of your pages, right before the closing `</body>` tag, to enable them. jQuery must come first, then Popper.js, and then our JavaScript plugins.
